Tuncay Özilhan, the Chairman of the Anadolu Group, who came together with the successful youngsters at the awards ceremony, said, “The business world of today is progressing on a structure of global and competitive international partnerships. The importance of youngsters, who are educated, equipped, are able to think extensively, and possess the skill of solving problems, increases even more every day. Youngsters who are able to make a difference in the light of corporate values, vision and mission, are carrying companies to success. Therefore, as the Anadolu Group, we have supported the UçArı Incident Analysis Contest this year, as we have done in previous years. As a Group, as well as this continued support, we have, over the years, employed some of our colleagues within our companies. We have employed the youngsters at both our holding head office, and our domestic and overseas companies, due to their success in this contest.”
